Subject:	News Release
Product:	BidTabs Professional
Version:	8.10
Date Posted:	04/01/2010

Oman Systems announces the latest release of **BidTabs Professional** (Version 7.00). This release adds report options to filter the reports by project type. Oman Systems created a program to classify each project into one of twenty-eight project types. All of the project databases for all 48 states have been updated to include the project types.

The project types are assigned by calculating the totals for each category of work based on the 31 pay item categories assigned by Oman Systems. The project type is set to the largest category dollar value where the category is at least 20% of the total project value. Of the 31 predefined categories, Oman Systems has combined a few of the pay item categories into 28 project types.

After updating the tabs databases to include the project type, Oman Systems then updated the **BidTabs Professional** system to include the project type as a filter on the report options screen. The following reports have been updated to include a selection of project type:

- Letting Report
- Contractor Analysis Report
- Market Analysis Report

Oman Systems continues to update and enhance **BidTabs Professional** to meet the needs of its customers. If you have any questions about any of these new features, contact Oman Systems at 800-541-0803 or visit the Oman Systems website at www.OmanCo.com.
